

California Department of Fish and Game

Seasonal Job Bulletin

for Fish and Wildlife Scientific Aid

Job Description

Under the close supervision of the Senior Environmental Scientist and lead of a Staff Environmental Scientist, this position will support Program personnel in the activities associated with Lake and Streambed Alteration (LSA) program development and implementation in the Sacramento Headquarters Office.

Duties include, but are not limited to, assisting in researching information and reporting in support of policy development, compiling materials for meetings and workshops, database analyses and quality control, library organization and scanning, and routine administrative functions.

The incumbent will gain an understanding of the LSA and California Environmental Quality Act (CEQA) programs and the inter-relationship of other Branch functions, including Timber Harvest Review. This is an opportunity to participate on a team that addresses state-wide issues facing the Department of Fish and Game and fish and wildlife trust resources.

Excellent organizational and writing skills are desired.
